

Scrapbook.com

We are so excited that you are using our Little Houses cut file collection! These were designed by paper crafters FOR paper crafters, and they are SO MUCH FUN!

There are four main folders inside this .ZIP file:

Tall House

Short House

Short House
with Chimney

Customize
Your Own

The Tall House, Short House, and Short House with Chimney folders contain quick project files where the files are set up to cut exactly what you need to make the sample houses shown on the product page at Scrapbook.com. Make one house using the parts in each folder, with the paper of your choice, and you're well on your way to a village!

In every folder, you will find SVG and PNG versions of every file. In some folders, you will also find SVG files WITH score lines. We recommend using the SVG version with the score lines - it will make it so much easier to fold your house pieces!

All lines in the SVG files are color coded:

 Cut lines are always GREEN  Score lines are always RED

If you're ready to make a whole village, or you just want to do your own thing, open up the folder labeled Customize Your Own! You will find a folder with all of the parts we made for the Tall House, and another with all of the parts we made for the Short House.

We look forward to seeing your handmade creations in the Scrapbook.com Gallery!

LICENSE INFO

You may use these files to make scrapbook pages, cards, and other awesome, crafty projects! We look forward to seeing the beautiful handmade creations you make using these files! You may post photos of the works you create with these files in the gallery at Scrapbook.com, on social media, and on your personal blog. You can submit photos of your creations using these files on blogs that don't belong to you, and to magazines and contests too. Please be sure to list Scrapbook.com and the kit name when you are asked to list the supplies you used in your project.
