

Scrapbook.com

We are so excited that you are using one of the Scrapbook.com cut files! These were designed by paper crafters FOR paper crafters, and we think you'll love them! Follow your machine's instructions to load the SVG or PNG files into the software you use with your electronic cutting machine and craft away! We recommend using the SVG version, especially for layered designs, but if you are unable to use the SVG, your software may allow you to use the PNG version instead.

To make things convenient, SVG and PNG versions of the same file will always be in the same folder.

We look forward to seeing your handmade creations in the Scrapbook.com Gallery!

LICENSE INFO

You may use these files to make scrapbook pages, cards, and other awesome, crafty projects! We look forward to seeing the beautiful handmade creations you make using these files! You may post photos of the works you create with these files in the gallery at Scrapbook.com, on social media, and on your personal blog. You can submit photos of your creations using these files on blogs that don't belong to you, and to magazines and contests too. Please be sure to list Scrapbook.com and the kit name when you are asked to list the supplies you used in your project.

Each file contained in this zip file is, individually and collectively, exclusively the property of Scrapbook.com, and your use of any or all of the files is for your personal use only. Scrapbook.com retains any and all rights in the files and any use of the files for commercial purposes.

You understand that any commercial use or distribution of the files to any other party may subject you to legal action. Scrapbook.com reserves the right to pursue legal remedies against any party that uses the files in a commercial capacity or distributes them to any other party.
